- Green friendly product

Fast, friendly and helpful customer service

overview

Clearviews French balconies are a great way to complete your French door installation. They give you a unique rounded surface for you to rest your arms on whilst enjoying your view.

Clearviews breaks the typical issue of safety products being ugly or bulky. These minimalistic French balconies yell contemporary and are truly beautiful products in themselves.

Why interrupt your natural light with multiple upright railings? Imagine glancing over, through your French doors and just seeing your view, not a bunch or iron bars. Low maintenance is also something everyone can enjoy. Why go through the hassle of repainting railings every couple of years?

Clear Anodized color pictured here

goodbye old iron bars, hello modern!

Did you know? Also made of anodized aluminum:

Many of the satellites circling the Earth are protected from space debris by layers of anodized aluminum.

Due to its amazing corrosion resistant properties many modern boat masts are made of aluminum.

eco-friendly

A large percentage of the aluminum used to produce these products is recycled aluminum. Aluminum is 100% recyclable.

As it is the 3rd most plentiful element in the Earth's crust (third only to oxygen and silicon), it is a completely sustainable resource.

These products don't need repainting like wooden products. This helps keep harmful VOCs out of the environment.

With this product allowing more natural light into your rooms, it can help decrease the need for as much artificial lighting and thus aid the environment and save you money.
