- Curved or straight
- Low maintenance
- Holds up in marine environments where other materials fall down
- Doesn't require repainting
- A truly rust free product
- Very competitive prices
- Easy to install
- Green friendly product

Fast, friendly and helpful customer service

Curved balconies done using the Clearviews system 1 railing

# overview

Clearviews railings open up your view and provide a truly luxurious feel and look. With two options of top rail to provide the comfort and look that suits your tastes.

We have gone beyond “functional” and offer a product that is as beautiful as it is sturdy. Our minimalistic railings yell contemporary and serve to enhance any property or deck.

The system has been designed to span a distance with minimal uprights and in some cases no uprights are needed at all.

Our system requires no surface mount glass clips or brackets to hold the glass in place so you get the cleanest possible look.

Both systems take advantage of the Clearviews “concealed” mounting hardware to create a very clean fastening of the handrail to the wall without ugly hardware showing. The system itself is manufactured with installation in mind and is commensurately simple to install compared to many other systems.

Clearviews System 1 cross section

Clearviews System 2 cross section

The Clearviews railing systems have gone through rigorous safety testing both on completed installations and in laboratories so that you can have peace of mind.

Also available

#### Coating

Powder coating or anodized finishes

#### Glass

3/8" clear tempered glass  
Tinted glass is also available

#### Guard rail structure

6063 T5 extruded aluminum profiles

#### Gaskets

EPDM (ethylene-propylene rubber)

#### Wall Brackets

Stainless steel

# technical information

Imperial Chrome

The Clearviews railings are great for costal properties where other materials would rust or corrode. Thousands of boat masts are made of this same material due to how well it holds up in severe salt water environments.

The rounded cap at the top of the railing provides a comfortable surface to rest your arms on and look out.

It also serves to give structure to the system and relieve the glass of stress making it much stronger.

Clearviews systems 1 in clear anodized

Clear anodized

# goodbye old iron bars, hello modern!

**Did you know? Also made of anodized aluminum:**

Many of the satellites circling the Earth are protected from space debris by layers of anodized aluminum.

Due to its amazing corrosion resistant properties many modern boat masts are made of aluminum.

## eco-friendly

A large percentage of the aluminum used to produce these products is recycled aluminum. Aluminum is 100% recyclable.

As it is the 3rd most plentiful element in the Earth's crust (third only to oxygen and silicon), it is completely sustainable resource.

These products don't need repainting like wooden products. This helps keep harmful VOCs out of the environment.

With this product allowing more natural light into your rooms, it can help decrease the need for as much artificial lighting and thus aid the environment and save you money.
